**Ensuring safety and comfort in
food production environments**

FOOD INDUSTRY

Ensuring safety and comfort for employees in food production environments is paramount to fostering a safe, productive, and positive workplace.

At Justrite, we recognize the unique challenges faced by the food processing and hospitality industries and tailor our solutions to meet your specific needs. Whether you're managing a bustling kitchen, a busy food processing plant, or a bustling restaurant, our products are designed to streamline your operations while prioritizing safety. From ergonomically designed safety equipment to specialized storage solutions for hazardous materials, Justrite is your one-stop destination for all your workplace safety needs.

For over a century, Justrite Safety Group has helped protect where the world works.

We cover every facet of the industrial safety landscape—from the storage, containment and clean-up of hazardous materials to motion safety and emergency showers.

Whatever your needs, we can help you build the foundation of a safe, productive workplace.

FOOD MATTING

**Safety and comfort on slippery
floors in food environments.**

Ergonomic benefit derived from a thick worker platform made of a tough yet resilient rubber.

Specially designed for the food industry, Sani-Flex™ food service anti-fatigue matting provides the optimum combination of comfort, anti-slip surface, quality and durability, as well as oil/grease resistance. Made of tough rubber compounds, designed to yield a long service life. Slip resistant surface for added grip.

526 Sani-Flex™

Specially designed for the food industry.

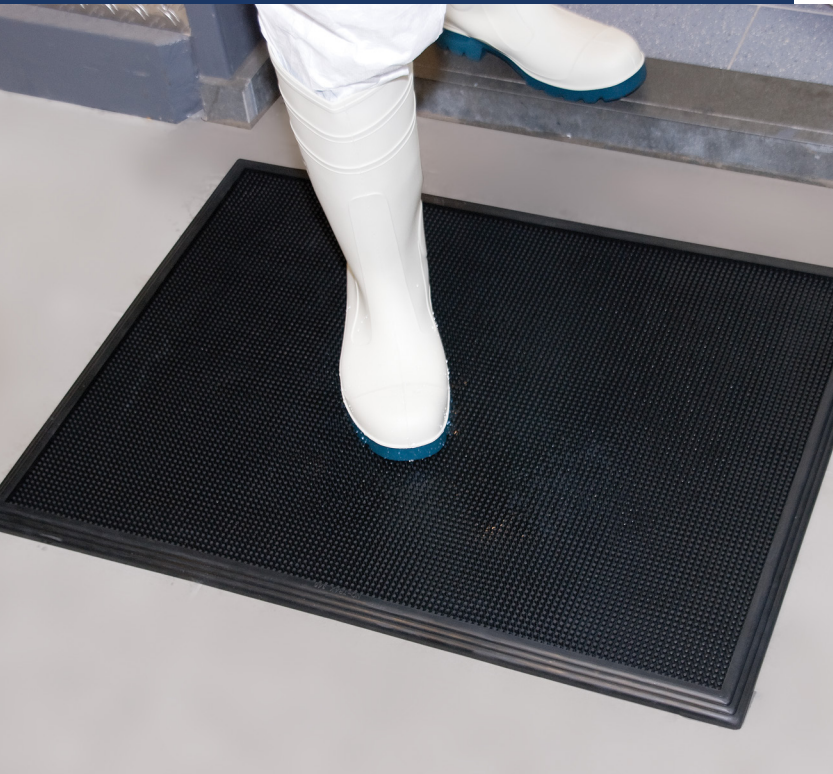

- Provides an optimum combination of comfort, anti-slip, and durability.
- Closed anti-slip gritted structure surface.
- Made of tough nitrile rubber compound, resistant to oils and greases
- Dry, oily or greasy areas - food processing (meat, fish), food packaging, professional kitchens and food preparation areas.

FOOD MATTING

**Safety and comfort on slippery
floors in food environments.**

A range of mats for food service for use in wet, dry and greasy areas.

346 Sani-Trax™

This mat cleans and sanitizes shoes, and is recommended at entrances to all food processing areas.

- Flexible fingers provide scrubbing action that dislodges contaminants from footwear.
- As traffic passes, rubber tips bend under pressure to immerse soles in disinfectant solution.
- Convenient mat size fits most doorways.

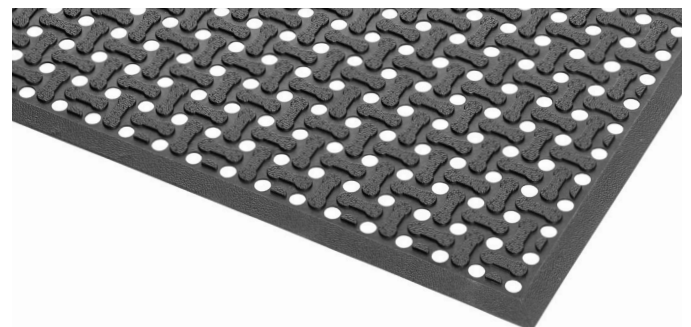

455 Skystep™

Ergonomic bubble pattern to provide maximum fatigue relief while maintaining its anti-slip properties.

- Designed to suction to the ground.
- Natural rubber compound for general purpose use.
- Dry areas – food processing, food packaging, food preparation areas and bars.
- Overall thickness: 13 mm
- Weight: 10 kg per m²

Stock sizes:

- 60 cm x 90 cm
- 90 cm x 120 cm
- 90 cm x 150 cm

567 Superflow® XT

Reversible anti-slip mat is remarkably comfortable and usable on both sides for extended life.

- Its perforated woven surface is slip resistant while allowing instant evacuation of liquids.
- Lightweight to facilitate lifting and cleaning.
- 100% natural rubber compound.
- Overall thickness: 8.5 mm
- Weight: 8.8 kg per m²

Stock sizes:

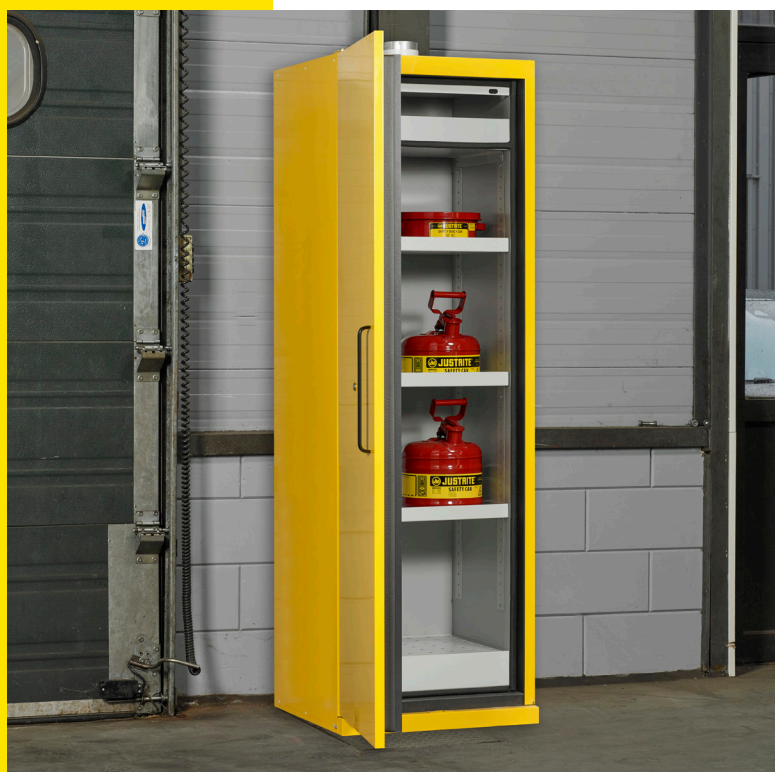

- 60 cm x 90 cm
- 91 cm x 152 cm
- 122 cm x 183 cm

SAFETY CABINETS

Store flammables and chemicals in high performance safety cabinets.

A comprehensive range of EN and FM certified cabinets with sizes and features to suit your requirements.

Protect workers, reduce fire risks, and improve productivity by storing flammable fuels and chemicals in safety cabinets backed and trusted for over 100 years.

Justrite's safety cabinets are constructed of durable materials to ensure safe and secure storage of hazardous materials. High-performance, self-latching doors close easily and securely for maximum protection under fire conditions. EN or FM cabinets available in various sizes from compact to large double drum solutions to suit any requirement.

RIGID-LOCK QUICKBERM®

Flexible and durable drive-in long-term spill containment.

Manufactured in the Netherlands with standard or custom sizes are available to suit your project requirements.

JEN28370YL

The Rigid-Lock QuickBerm® range offers superior protection and chemical resistance against the harshest of liquids, including petroleum, oils, greases, and most acids whilst offering the best flexibility. Patented Rigid-Lock stainless steel brace supports walls at full 90° locked position for secure, leakproof containment. A simple push on the walls unlocks the support and lays the wall down for drive-through capability from any angle. Folds away for easy storage.

Tarps, track mats or track runners are available to provide extra protection against rocky surfaces or heavy in-out traffic use.

SPILL PALLETS

**Keep workers safe and protect the environment
from accidental spills.**

Durable 100% recycled polyethelene construction. Load and unload with ease using optional ramp with anti-skid diamond pattern.

JEN28650YL

JEN28650YL

Protect against ground contamination and comply with EPA regulations and avoid potential fines. Made of molded 100% recycled polyethylene, these pallets resist chemical attack from hazardous acids, caustics and solvents. The oversized sump holds the contents of an up to a 200 liter (55 gallon) drum in the event of leak or rupture -- meeting or exceeding the most stringent spill containment regulations. Seamless construction eliminates leaks and self locating grates lift off for quick cleanup. EPA compliant, supports SPCC, and meets NFPA 1 2009 edition and IFC fire codes.

HPLC DISPOSAL SAFETY CANS

The only FM-approved HPLC cans
keep labs and personnel safe.

Easy-on, easy-off mechanism offers detachment of the can from the process without leaks, drips, or vapour release. Control odors with a coalescing/carbon filter.

Solvents flow freely from your process into the container through tubing making it suitable for either pump-fed or gravity-flow HPLC waste methods. Two disconnect fittings, one intake, and one vent eliminate back pressure in the liquid flow disposal line and provide controlled handling of vapour. Translucent polyethylene container allows quick visual inspection of liquid level. The pouring spout has a stainless steel flame arrester, which reliably dissipates heat to prevent flashback ignition. The spring-loaded sealed lid automatically vents to guard against explosion.

OVERPACK CONTAINERS

**For safe storage, handling
and transportation of hazardous materials.**

Ideal for safe storage, handling and transportation of hazardous materials.

Constructed of yellow blow-moulded high-density polyethylene (HDPE) with UV inhibitors, is durable and lightweight, weather and chemical resistant, and has a screw-on lid for secure containment. Ideal for safe storage, handling and transportation of hazardous materials, spill containment and cleanup of hazardous materials, original shipping container, bio waste disposal and incineration. UN and Accord Dangereux Routier (ADR) certified for the transport of dangerous goods by road.

SAFETY SHOWERS

**Safety showers and eye/washes
for use in indoor and outdoor areas.**

No matter the location, all of our plumbed-in and self-contained (portable) emergency eyewash stations are designed to be quick and simple to operate.

We have a comprehensive range of indoor, outdoor and portable self-contained safety showers and eye washes. For hot and cold environments we offer heated, jacketed and temperature controlled solutions to ensure safety no matter the environment. We have been at the forefront of emergency safety shower, eye/face wash and decontamination equipment manufacturing for more than 50 years. Built on a solid foundation of design and engineering excellence we provide customized industrial safety shower solutions to suit all applications, in all industry sectors and environments.

OPTIWASH[®] **EYEWASH STATION**

**Self-contained gravity-fed wall-mounted
eye/face wash.**

In locations where a continuous supply of potable water is unavailable, this wall-mounted eye/face wash unit offers the solution to keep your workforce safe.

The slimline 38 litre tank delivers a controlled flow of a minimum of 1.5 litres per minute of water for 15 minutes, meeting EN15154 and ANSI Z358.1-2014 requirements. Suitable for indoor use and with the addition of optional insulated or heated jackets, can also be installed outdoors.

HEW10GFEWJ

Insulated and heated for the OptiWash™ self-contained emergency eye wash station keeps water tepid in extreme hot or cold temperatures.

Removable jacket is easy to install or remove with a drawstring closure.

Water preservative additive available to eliminate bacteria that can form in standing water.

DRUM FUNNELS & EQUIPMENT

Prevents spills when transferring flammable solvents, thinners, oils or paint wastes.

Heavy-duty galvanized steel construction with electrostatically applied epoxy powder-coat offers excellent durability and chemical resistance.

Galvanized steel construction with a durable exterior epoxy powder-coat finish. Safely transfer flammable liquids or finely milled substances into a drum using this safety funnel that fits into a bung.

A built-in brass flame arrester absorbs and dissipates heat preventing any external ignition source from reaching the drum's content. Self-closing cover with a fusible link, that melts at 74°C, automatically shuts in case of a fire. Lid in closed position reduces vapors and accepts a lock (not included) to prevent unauthorized access. FM-Approved. EPA and OSHA compliant.
