Safety Solutions

 **Justrite**[®]
Safety Group

One Safety Solution

Justrite Safety Group offers industrial safety solutions and expert advice from our portfolio companies around the world.

We cover every facet of the industrial safety landscape — from the storage, containment and clean-up of hazardous materials to motion safety and emergency showers.

Whatever your needs, we can help you build the foundation of a safe, productive workplace.

A Growing Justrite Family

In recent years we have grown, expanding Justrite Safety Group through the acquisition of other strong, valuable companies. Because of these exciting changes, we want to share our story with you—one of an unrivaled safety portfolio, expertise in environmental protection, a global network of brands, and a steadfast dedication to our customers' safety.

Start with the EssentialSM

The essence of our company is captured in a new tagline: Start with the EssentialSM. At Justrite, everything starts with safety. Protecting people, property and the planet is our first and greatest responsibility. We provide the essential safety products you need to protect your workers and workplace.

Our company logo has recently evolved. The new logo honors our heritage in fire safety, while reflecting our expertise in containment and environmental protection.

Construction Safety Solutions

A construction site is an ever-changing environment, creating a very dangerous place. But the hazards associated with construction sites are well known. Protect the employees, visitors and manage the site effectively, by implementing appropriate safety solutions from Justrite Safety Group. There are three different safety solutions a construction site can apply to prevent the hazards and reduce the risks:

Site Safety

Traffic flow around a busy site is a major source of risk and we can offer a range of management solutions, such as ground mats, cable protector, spill control, column protector, parking solutions and more.

Material Safety

Our safety portfolio can help to minimize the risks around material handling, with a variety of solutions for storing and disposing of materials, from flammable and hazardous materials to waste disposal solutions.

Emergency Response

Be prepared to quickly respond to any type of spill, contamination or leaks that occur. Our range of safety solutions provide spill control and containment products, emergency safety showers, absorbents and spill kits. Everything you need for effective containment and clean up.

Site Safety

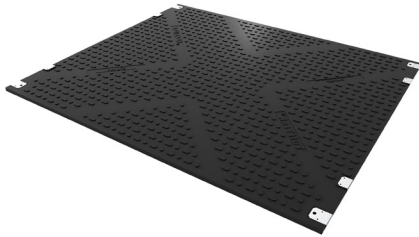

Temporary access road

A full range of market leading heavy to light duty composite ground protection mats delivering a safer working environment for use as temporary access roadways for heavy traffic, work areas for plant and machinery, pedestrian walkways, drilling rigs, depot or storage areas.

Our mats are unequalled for quality and performance even under the most hazardous conditions. Will not rot, rust or crack.

Heavy duty ground protection mats

Extreme heavy duty road mat specifically designed for the most challenging ground conditions.

- Capable of supporting heavy loads in excess of 600 psi*
- Highly resilient to extreme weather and ground conditions
- Connectors available for a secure trip-free solution
- HDPE

Medium duty ground protection mats

Flexible construction for mats to follow the contours of the ground to deliver a highly effective access solution over undulating or sloping ground conditions.

- Connectors available for a secure trip-free solution
- HDPE or LDPE
- Lightweight can be moved by two people

Light duty ground protection mats

Can be easily deployed for temporary applications as lawn protection and event flooring or can be installed for prolonged periods for light to medium vehicles or pedestrian traffic in medium to firm ground conditions.

- Weatherproof, flexible, and less likely to break and splinter
- The textured slip-resistant surface
- Overlap connector option available
- Can be moved by two people

Outrigger Pads

Outrigger crane pads provide a cushioned, stable load platform for outriggers and prevents damage to the ground.

- Reduce risk of heavy equipment toppling with stabilizing outrigger pads
- Protect against damage to wood, concrete, or asphalt surfaces
- Ideal for use in all weather conditions

Site Safety

Vehicle Safety

Wide variety of vehicle-based safety solutions for all motion-related activities, designed to support many different vehicle types. Products include wheel chocks, warning whips, cable protectors, parking lot safety solutions, and more.

Wheel Chocks

Offered in a variety of styles, our wheel chocks provide a safe chocking solution for any type of vehicle. Whether you are chocking a fully-loaded 400-ton haul truck or a utility trailer, we have the wheel chocks you need.

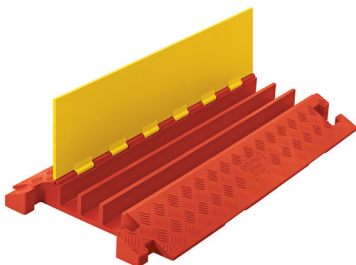

- Lightweight with tough urethane construction
- Resistant to extreme weather, oils, fuels, and solvents
- Engineered to reduce damage to your vehicle's tires
- General purpose to heavy duty options

Warning Whips

Warning whips are built with high quality materials and are designed to make vehicles and points of interest more visible. They are critical to safety on job sites that utilize large equipment, so that smaller vehicles can still be seen.

- Warn others of a vehicle's presence
- Various heights available
- Sealed connections prevent corrosion & deterioration
- Interchangeable light options

Cable Protectors

Durable cable protection systems provide a safer method of passage for pedestrian traffic, vehicles and heavy-duty equipment while protecting valuable electrical cables, cords and hose lines from damage.

- Modular, interlocking design
- Protects cables and hoses
- Weather & UV resistant polyethylene
- Heavy, Medium and Light duty
- 1, 3 or 5 channels

Parking Solutions

Designed for speed reduction, these solutions keep roads and parking lots safe for both motorists and pedestrians. Checkers speed bumps, speed humps, and car stops are long lasting, easy to install, and environmentally friendly.

- Weather and UV resistant
- For both temporary or permanent use
- Various sizes and colors available

Hose Bridges

Diamondback® hose bridge systems provide customizable protection for valuable cable and hose lines. They replace wooden and metal fabricated ramps.

- Protect lines up to 11,4 inches in diameter
- Modular interlocking design
- High density, all-weather polyurethane
- Diamond-plate tread surface

Curb Ramps

Provides an ergonomically correct method to move heavy loads over curbs or up steps.

- Raised surface for excellent traction in all weather conditions
- Two handles with rounded edges make for easy pick up, carrying and handling
- High density polyethylene, lightweight at just 4kg

Material Handling

Spill Containment

Hazardous leaks and spills are a relentless challenge. Slippery floors indoors can lead to a fall accident with associated costs and severe time lost. In addition to the damaging effects to our environment, EPA fines for contamination of our outdoors can be staggering.

Steel Spill Control Pallets

Our complete range of painted steel spill pallets is designed and tested for the safe storage of drums containing chemicals, and hazardous or polluting liquid substances.

- Removable galvanized high load capacity grating
- Galvanized steel or Painted steel version
- Easy and quick to clean
- Made in the EU

Plastic Spill Control Pallets

Safe, secure, and compliant outdoor storage for drums. Fully compliant, leak-proof pallet sump has removable, durable deck grating for easy cleanup of spills

- Seamless construction eliminates leaks
- Polyethylene & steel options
- Optional ramp available
- Mobile steel spill pallet option

Flexible Spill Containment

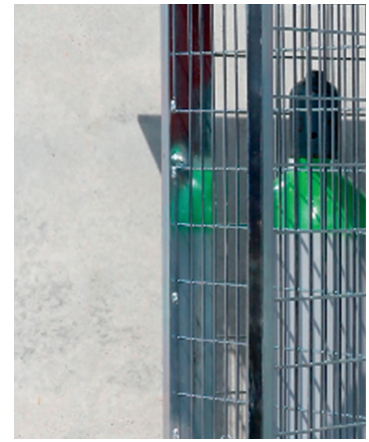

Ergonomic design provides 100% inside berm accessibility with an unobstructed side-to-side floor space for vehicle tires, foot traffic, and cleaning.

- Modified PVC coated fabric
- Feature vehicle drive-in, drive-out capability, and offer fast, one-piece set up
- Optional grates to help reduce contact with contaminated liquids by personnel or equipment
- Made in EU

Material Handling

Outdoor Safety & Storage Cabinets

Our safety storage cabinets offer top performance for outdoor flammable liquid storage and protection.

Outdoor Safety Deposits for IBCs

Safe, secure, and compliant outdoor storage for indoor IBCs

- Hot galvanized sheet metal sump or recycled polyethylene
- Lockable door
- Removable grid for easy clean-up

Outdoor Safety Deposits for Drums

Designed for the safe outdoor storage of drums containing hazardous and flammable substances.

- Sheet steel construction or recycled polyethylene
- Easily removed for maintenance and cleansing
- Features weather-resistant

Flat Pack Modular Containers

Modular containers are the best solution to optimise storage and transport space thus reducing transport costs.

- Easy to assemble
- Suitable for limited access areas
- Ideal solution for chemicals, flammable and polluting liquids
- Available in galvanized steel or overpainted galvanized steel

Gas Cylinder Storage

Storage deposit cages for compressed gas cylinders designed for modularity and safety.

- Hinged doors with intrusion protection safety lock
- Manufactured from steel
- Modular

Material Handling

Storage & Dispensing

Justrite offers a number of cans to storage and dispense flammable liquids and solvents safely, without waste or exposure. The containers are ideal for all industrial sectors to collect, store and unload production materials, waste and scrap.

Galvanized Steel Safety Cans

Protect workers and reduce fire risks by transferring, storing and dispensing flammable liquids OSHA-approved.

- Stainless steel flame arrester
- Tough powder-coat finish resists chemicals
- FM, UL/ULC, OSHA and TUV approved
- Made in the EU

Oily Waste Cans

Dispose of oil-soaked rags and prevent fires caused by stray sparks or spontaneous combustion.

- Lid stays closed when not in use
- Galvanized steel or polyethylene
- Resistant to most chemical compounds
- Various colour options
- FM Approved

Drum Funnels & Accessories

Using a drum funnel, or vent on your chemical storage containers will reduce the risk of a spill when dispensing or filling containers. The wires prevent sparks from static electricity

- Drum funnels in Galvanized steel
- The wires prevent sparks from static electricity
- Vents in polyethylene & Steel options

Skip Dumping Containers

The best solution to facilitate industrial materials collection, handling and unloading.

- Multi-purpose painted carbon steel tipping skips and bins for materials
- Safe forklift handling and unloading
- Simple and safe automatic emptying
- Available in orange, blue and green

Openable Bottom Containers

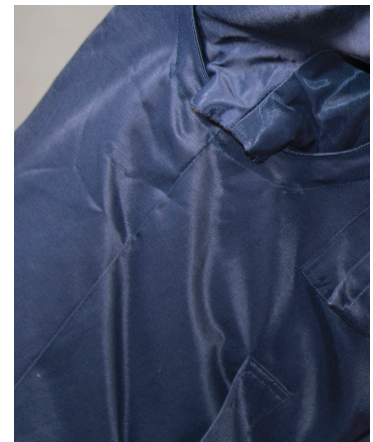

Ideal for all industrial sectors to collect, store and unload production materials, waste and scrap. Designed to be lifted by forklifts and easily emptied by the operator.

- Painted carbon steel drop bottom opening skip containers with one door
- Safety mechanism to prevent automatic openings
- Available in orange, blue and grey

Emergency Response

Safety Showers

Our emergency safety showers, and eye/face wash units provide the first line of defense in the event of a chemical splash or spillage. Any delay in the removal of these spillages can result in serious injury with possible long-term consequences, permanent disability and even death.

Self-Contained Tank Showers

Essential where tepid water or a constant supply of water is not available. Suitable for use where insufficient water pressure exists or when it is impractical to use a plumbed in safety shower.

- Outdoor immersion heated model maintains water temperature above 19° C
- Internally or side mounted eye/face wash
- 350L or 1500L versions

Portable Safety Shower

For standby use in environments where no water or constant water supply is available, or when existing safety showers are undergoing maintenance.

- Suitable for indoor or outdoor use
- Covered eye/face wash protects the bowl and diffusers against dust and debris
- Easily manoeuvred by one person
- 114 litre capacity

Portable Emergency Eye/Face/Body Wash

This portable 15 litre stainless steel cylinder with Optiflex hand shower effectively washes eyes, face and body delivering up to three minutes of water when pressurised via a Schraeder valve.

- Portable
- Self-contained, no mains water supply required
- Simple to use
- Suitable for indoor use

Self-Contained Eye/Face Washes

Ideal for use where a continuous supply of water is unavailable. Supplied with a bracket, this slimline unit can easily be mounted to a wall.

- 38 litre gravity fed
- Ideal where there is no potable water
- 1.5 litres water per minute for 15 minutes
- Insulated jacket available

Emergency Response

Spill Management

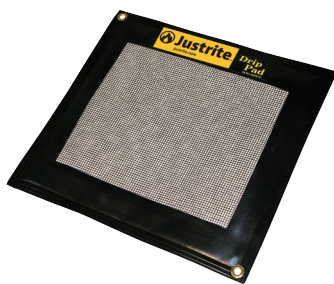

Our comprehensive spill control and environmental portfolio will help you to be prepared to quickly respond to any type of spill or hazardous leaks, including a line of absorbents, covers, diverters and spill kits.

Spill Kits & Absorbents

Spill response kit offers complete solution for effective clean up and disposal.

- Kits include pads, socks and pillows
- Oil, universal and chemical options
- Small to medium spills up to 120 litres

Drip Pads

Capture small oil leaks and drips before they contaminate the ground or create unsafe work surfaces.

- UV & chemical resistant PVC
- Patented design features mesh outer layer to trap coarse debris
- Replaceable oil-only sorbent within a welded leakproof barrier

Water-Filled Drain Covers

Ensure regulatory compliance and prevent run-off pollutants from entering storm water drains.

- Deploy as preventative measure to seal drains
- Durable modified vinyl
- Easy-open push plug for filling with standard water hose

Water-Filled Boom Diverters

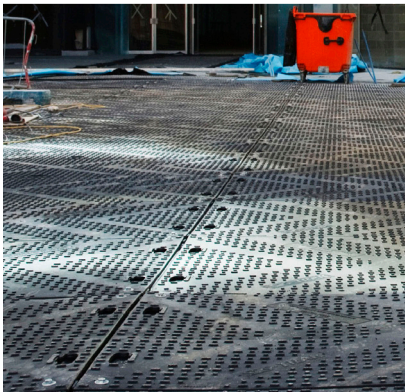

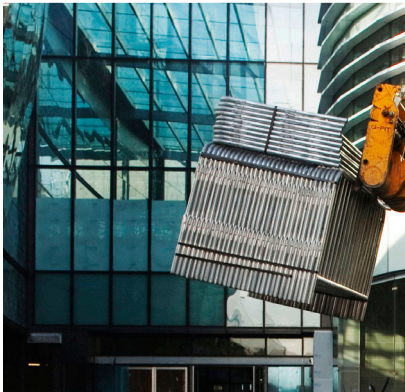

Temporarily divert and control fluid for easy clean-up or recovery. Helps comply with EPA for storm water regulations.

- Ideal for storm water management, water & spill diversion
- Flexible PVC film construction.
- Easy-open push plug for filling with standard water hose
