

353 Boot Wash Station

Clean and disinfect bottoms of shoes to limit the spread of contaminants

The 353 Boot Wash Station cleans the bottoms of shoes to help keep germs and contaminants from being tracked through the workplace. Fill the tray with a disinfectant or sanitizing solution and the sponge insert absorbs the solution. Stepping on the sponge pushes the solution into the grooves on the soles of footwear for a thorough cleaning.

- Limit the spread of contaminants on floors
- HDPE tray withstands most chemicals and temperatures variations
- Tray is 2.5" high and holds 2.5 quarts of sanitizing solution
- Rigid edges make emptying tray easy
- Replacement inserts available

Item Number	Description
353S1836YL	353 Boot Dip Tray Kit, 18" x 36". Kit includes Boot Wash Replacement Insert.
353SC318BL	353 Boot Wash Replacement Insert, 3/pk
353SC618BL	353 Boot Wash Replacement Insert, 6/pk

For a complete solution, step out of the Boot Wash Station onto the NoTrax 048 Grip-Sorb™ absorbent runner. It's a thin, absorbent mat that stays in place to prevent slips, even when wet. The adhesive backing holds it firmly in place but removes easily without leaving a sticky residue.
