

355 Shoe Sanitizer Systems

Simple, safe and effective shoe disinfecting systems

It's never been easier to disinfect shoes! These shoe sanitizing systems provide an effective solution to minimize the spread of contaminants tracked on the bottoms of shoes. Designed as a zoned system, the components are completely contained and secured with no slipping or sliding from disconnected pieces. The carpet mat inserts are disposable and replaceable for quick and easy cleaning.

Available in 2-zone (disinfecting, drying) and 3-zone (cleaning, disinfecting, drying) options, each system safely cleans and sanitizes shoe soles, then quickly dries them the moment you step out. The system includes easy-to-read instructional messaging to guide through proper sanitizing, making it ideal for entrances to schools, businesses, facilities, and more.

- Limit the spread of contaminants on floors
- Labels clearly instruct how to sanitize shoes
- Low profile bevels for easy walk on/off to minimize trip hazards
- Mat inserts are adhesive backed and replaceable for easy cleaning and a longer lasting solution
- Carpet mats are made from recycled plastic bottles
- System is lightweight—easy to set up and move
- Vinyl backed to prevent slipping

Rock feet back and forth to push cleaning solution into shoe treads.

3-Zone Shoe Sanitizer System (cleaning, disinfecting, drying)

2-Zone Shoe Sanitizer System (disinfecting, drying)

Step 1: Cleaning Zone (3-zone system only)

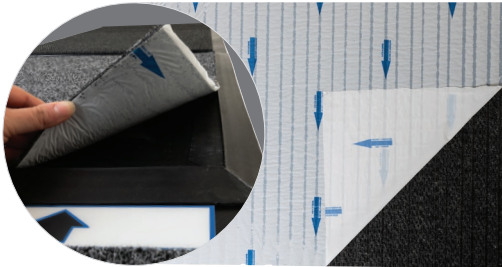

Shoe scraper carpet helps remove dirt, grime and organic matter to better sanitize shoes. This preliminary cleaning to remove debris is ideal for dirty, industrial or commercial locations.

Step 2: Disinfecting Zone (2-zone and 3-zone system)

A removable tray holds disinfecting solution and a scraper mat. The coarse mat fibers scrape the bottom of shoes; as soles become saturated with cleaning solution, the mat fibers help guide the solution deep into shoe treads.

Step 3: Drying Zone (2-zone and 3-zone system)

A highly absorbent Berber mat provides quick drying and slip prevention after disinfecting shoes.

Peel and stick carpet inserts attach securely, then remove easily to clean and dispose.

355 Shoe Sanitizer Systems

| Description | Size | Item Number |
|------------------------------|-----------------|-------------|
| 2-Zone Shoe Sanitizer System | 25.5"W x 52.5"L | 355S002500 |
