

Filling, Supply and Disposal Cans

These cans are used for carrying flammable liquids from drums or pumps, for filling other safety cans and for keeping a small supply on hand at benches or machines. They are all equipped with flame arresters.

Liquids should be transferred from the original container or drum to the safety can in a cutoff area away from the main drum storage or combustibles. The best method of transfer is by means of manually operated drum pumps or portable pump tanks. With this equipment, liquid cannot flow out except through the pump itself. The only other acceptable method is the use of self-closing faucets or valves on the drums.

Disposal cans are used to dispose of flammable or corrosive liquids safely. They are equipped with a 4 in. (102 mm) diameter opening.

Models 12752, BR12752, PL12752, AF12752, PP12752, TF12752, BY12752, PS12752, FS12752, 12755, BR12755 ...

Disposal Can with Quick Disconnect. Non-metallic. Models 12752, 2 gal (8 L); 12755, 5 gal (19 L); 12768, 2 gal (8 L); 12769, 5 gal (19 L). May be prefixed BR, PL, AF, PP, TF, BY, PS or FS to indicate optional quick disconnect material or type; stainless steel is standard.
