

## Bench Cans

Safety bench cans should be used for washing operations such as cleaning metal parts. The material to be cleaned is placed on a perforated metal pan flame screen which is held above the liquid surface by a spring in the container. The parts are immersed by depressing the pan. Release of the spring allows the perforated pan to rise and the parts to drain. Although the top is not self-closing, a fire in the container can be quickly snuffed out by manually closing the cover.

### **Models 10171, 10175, 10291, 10296, 10370, 10375, 10380, 103855, 10575, 10578, 10771, 10775**
