

# HFF Berm Drain Kit

# HFF Berm Drain Kit

## Flexible Spill Containment -

The HFF Berm Drain Kit is an eco-friendly, high-efficiency spill containment solution that safely drains clean water while capturing hydrocarbons (gasoline, diesel, oils) below 5ppm. With a 6.5 GPM flow rate, it prevents overflow and maintains berm capacity. Its automatic solidification seals oil/fuel spills, ensuring SPCC compliance, while the bidirectional design reduces trip hazards. Compatible with any berm system, it's ideal for construction sites, fueling stations, wash areas, and hazardous storage, providing passive, reliable contamination control.

- Superior Hydrocarbon Filtration: Filters organic hydrocarbons to <5 ppm, with most reaching non-detectable levels for effective containment.
- Automatic Solidification: Solidifies in the event of a full oil or fuel release, preventing hydrocarbon leakage and ensuring compliance.
- Unique Bidirectional Flow Design: Enables flexible installation inside or outside the berm, reducing exterior trip hazards and maximizing space efficiency.
- Versatile Compatibility: Works seamlessly with any new or existing flexible spill containment berms.
- Durable Construction: Features a rugged outer casing for long-lasting performance in demanding environments.
- Efficient Water Removal: Handles a horizontal flow rate of 6.5 GPM, ensuring effective drainage.

# Flexible Spill Containment - HFF Berm Drain Kit

## General

Brand	Justrite
Product Number	26-BDK
Product Family	Spill Control & Environmental
Product Group	Flexible Spill Containment
Product Name	HFF Berm Drain Kit
