

ASTM D2240-90

HARDNESS SHORE A

DUROMETER

GENERAL PRINCIPLE

To determine the indentation hardness of certain NOTRAX® Industrial Floor Mats.

A specific type of steel indenter is forced into the NOTRAX® Floor Mat, which is classified as Type Shore A.

TEST RESULT

xx- Shore A (xx = the resultant number)

For example, a result could be: 60 Shore A.

INTERPRETATION OF THE RESULTS

The greater the mat's resistance against the indenter, the higher the resultant number.

The most meaningful interpretation is to compare the Durometer readings of selected NOTRAX® Industrial Floor Matting products

All testing of NOTRAX® Floor Matting has been performed by an independent testing laboratory.
